Success in the Gulf Coast Country

Every Monday and Thursday there will appear in the columns of this paper an example of what has been done in farming in the Gulf Coast Country on the Brownsville Place.

33 Acres of Onions Realize \$11,000.

Mr. John Closser, of Hidalgo County, Texas, raised thirty-three acres of onions this Spring on thirty-three acres. His crop sold for \$11,000. He farms in the Gulf Coast Country where crops are sure and the yield immense.

Irrigation is one reason for his success. He does not depend on uncertain rainfall but has an inexhaustible supply of water which he can give to his fields just when they need it. Then he has a rich soil and a climate.

He will tell you other reasons for his success if you will write him at Hidalgo, Texas.

Wouldn't you like to have a small farm in the Gulf Coast Country where success does not depend on uncertain weather with irregular rainfall?

Now the land is cheap and you can get it on easy terms. Twenty acres will cost you about \$500. The cost of clearing is about \$5 an acre. The cost of water for irrigation varies. You may want an artesian well of your own; you may get water from some river; or you may get it from your neighbor. But the cost is not great, and those who have tried it have netted from the first crop a sum which has paid all expenses and left a good surplus.
